The Way to Make up Your Income Tax

Geo. Campbell reports that several of his customers are greatly perplexed regarding the proper procedure in completing the new Provincial Income Tax Form, and has asked us to outline some suggestions which may prove helpful to them. The procedure is something like this: You list as dependents one blonde wife, a sedan car, three goldfish and two children. Multiply your grandfather's age by six and seven eighths and subtract his telephone number. Next add the size of rubbers he wears and subtract the number of his liquor permit. After these preliminaries the rest is very simple. After deducting \$500 for keeping your wife blonde for the year, you divide the remainder by the number of lodges you belong to, multiply this by the number of electric lights in the house, divided by the size of your collar. This gives your gross income, which after division by your chest measurement and the subtraction of your blood pressure, reveals the net amount owed to the Government.

Chronicle Completes Thirteenth Year

This issue completes the thirteenth year of the Chronicle's existence in Champion. Ordinarily this calls for a resounding of the continued growth of the town and expansion of farming operations in the country, but somehow that kind of thing doesn't seem to fit at this time so we will put off comment until some later date.

Women's Institute

Members of the Champion Women's Institute were the guests of the Carmangay branch on Friday afternoon, 13th inst. Following the program in the United Church, which included a report of the District Conference, a contest, recitations and musical selections, furnished by the Baroness ladies, a delightful lunch was served in the rest room. The prize for the contest was won by Mrs. Wilson, Carmangay and Mrs. Bastin, Champion.

One of the most vicious and brutal crimes in the history of the United States occurred when Charles Augustus Lindbergh was kidnapped and murdered and buried in a nearby field. Up to the present the murderers have not been located, but everyone will hope that in the end they will get what they deserve—something worse than hanging if such a thing is possible.

O.O.R.P. spends Pleasant Evening

An unusually pleasant evening was spent on Tuesday by the O. O. R. P., the occasion being the official visit of Mrs. Chase of Jasper, Provincial Deputy of the O. O. R. P. Mrs. Chase complimented the lodge on their work and spoke very highly of the new floor work which, she stated, was the second lodge she had visited using lumber.

Lodge all adjourned to the banquet room where the tables were beautifully decorated with sweet peas and pink rose buds, making a display which was only excelled by the bountiful supply of good things served. The occasion was thoroughly enjoyed, and the Royal Purple won golden opinions as to their capacity as hostesses. The ladies wish to thank Geo. Campbell for the donation of a beautiful bouquet.

Local & General

Miss Aileen McCullough of Calgary spent the week end at her home.

Mrs. P. Patterson is entertaining the Amity Club Wednesday.

Miss Dora Taylor of Carmangay was a guest at the home of Mr. and Mrs. Bastin over the week end.

The Searele Grain elevator received a coat of paint during the week.

Wm. Bowman who has been confined to his bed for the past two months is convalescing and expects to be up in the very near future.

Miss Sarah Fleming spent the week end in Lethbridge, motoring back to Champion with a Chevrolet two door.

Two planes were busily engaged in carrying passengers on air trips Sunday and Monday of this week. There was quite a fair turnout for the occasion.

The home, formerly occupied by A. M. Watt and family, and owned by R. Tyler, has been rented by J. McIlvry.

Mr. Herb Williams is again able to sit around, following severe injuries received, when his team ran away while he was driving.

Lars Hjelle reports that his garden $\frac{1}{4}$ miles south of the dam is bigger and better than ever.

Johnny Weise and John and Ray Ohlbeiser left for Peace River on Tuesday morning.

Mrs. L. P. Schwartz and Mrs. Lundquist and baby of Calgary are visiting Mr. and Mrs. G. A. Fath and other friends.

Miss Doris Racher of Calgary General Hospital staff is home on her vacation.

Andrew Anderson received word during the week that he had successfully passed all subjects in his recent examination, with very high standing.

Miss Grace Genovese is convalescing following an operation for appendicitis at Pincher Creek.

Mr. and Mrs. George Depue motored to Calgary Tuesday accompanied by Mrs. J. McIntyre and Harry McNaughton.

Mrs. Therriault and Mrs. M. Sisson are convenors in charge of the C. W. L. tea, which will be held at the home of Mrs. D. D. Farmer, on Saturday, May 21. Everybody welcome.

Ronald Colman IN “The Unholy Garden”

The Unholy Garden! One of the few places still remaining where fugitives from justice may find refuge from the police and the law. Here from all over the world drifted adventurers who preyed on their fellow men—and strange beautiful women who preyed on the adventures. What a setting for Colman!

The answer to the exhibitors clamor for Colman in a picture of action! And action it has.

NOTES AND COMMENT:

Dubious Disguises

A half-century or so ago, when ownership of a horse and buggy was looked upon as a mark of wealth, very few persons engaged in association with financial debt, even among themselves, dares never was greeted with a word of welcome, and its entrance into the family was accepted only with a determination to eject it at the earliest possible opportunity.

Now, when such dubious debt, shunned by individuals and sheltered by governments only in times of stress, did not gain a very strong hold upon the public mind, some financial promoters save opportunity to give it a more attractive appearance and mask it as a welcome guest in circles that hitherto had looked upon its entrance as an intrusion.

The "dubious" debt, up. It was introduced as a respectable and promising member of financial society. Instead of being frowned upon it was grasped by the hand and asked to stay awhile. Then it was destined to sink around the back alleys, donned better clothes and boldly made its appearance at the front door where all the neighbors could see it.

Debt has accumulated a number of dimensions, aliases, and appears as deferred payment, as extended credit, as charge account, as promissory note, or in the larger public field as floating debt, as debts before owing, as beyond due date, and so forth. With the prosperity that followed the war there seemed to be a general rush for an accumulation of debt. Private individuals have been very active in the debts they come trading, while municipalities filled their vaults with obligations for generations to come.

While the incurring of debt has its place in the economic structure of world, it is not always economical borrowing and the like have distinct usefulness when judiciously employed. Yet there is no doubt that governments and individuals have been a little too free with the practice. Mortgaging too much of the future has its possibilities in immediate results but there is always a day of reckoning, and some consideration should be given to this before debt is invited to come in, unpack its trunk and stay a while.

A real feeling of friendliness came over one motorist recently when, overtaking a large oil truck on the road, he read these words, lettered on the rear panel of the truck: "Good, low, long, horns." Naturally, in passing one looked up at the driver with a friendly grin instead of the look so commonly given drivers of big trucks.

A teacher in a commercial school in the middle West says there is one lesson in the typing industry which book on which is not to be found: "How to do your best work." The lesson is made up of such words as "poor," "bad," "failure." If the words in a typing lesson can have such an effect, how carefully one should guard that spoken word which influences both him and others.

Too much publicity can hardly be given to the reply made by William Wrigley Jr. when once asked why he did not stop his tremendous advertising after he had built a gigantic business. His response was: "You ever hear of tramsmen, taking off the locomotive after they got the train moving?"

The fact that Soviet Russia purchased up to 40,000 tons of Manitoba wheat for immediate shipment to Vladivostok has caused no little comment here. Obviously the Canadian purchases were made in order to secure quick delivery. However, the Soviet Union has a large quantity of wheat from the Black Sea area for delivery in Great Britain. It is understood that several large cargoes of Australian wheat flour also had been purchased by the Soviet.

GOOD YEAR
PRIZE CONTEST

Here's a profitable way to spend half an hour . . . Glance at that prize list and you'll say "profitable" is right."

Anyone except tire dealers, employees of tire companies and the families of both can, without a cent of expense, try for one of the prizes.

All you have to do is to examine the six tires of various sizes, types and ply-thickesses available here. Figure out how many cords you think would be in each, add the six figures and divide by six to find the average. Use the section of tire cord fabric also on display to help you.

Submit your estimate on a standard entry blank. There is nothing to buy, no other special requirement, no cost to you.

Closing date: June 5th, 1932. Address: "The Goodyear Supertwist Cord Contest," New Toronto, Toronto 14, Ontario.

GRANLIN MOTOR

Come in and see Supertwist Cords demonstrated and get a helpful booklet of contest directions.

Economic Organization Within The British Empire Is Urged For Boosting Inter-Empire Trade

Formation of a permanent economic organization within the British Empire and elimination of party politics from imperial trade conferences were urged by Hon. Frank Carrel, prominent Quebec publisher, as steps toward a strong inter-Empire trade. The proposed permanent economic organization should be similar to the League of Nations. Mr. Carrel said in his address to the Canadian Club and Calgary Board of Trade:

The standard belief on one important result of the coming Ottawa Imperial conference would be the organization of such an economic body as suggested. This body would "technically, scientifically, and economically" find the solution of problems engrossing all the peoples of the empire.

Prominent Englishmen were rapidly becoming converted to the idea, he continued, and sympathy was growing stronger throughout the empire.

Mr. Carrel's plan also included an empire educational campaign through the press, platform and radio; founding of an empire industrial university; assistance in the production of British branch factories; co-operation of trade agencies and consular services; construction of empire ware houses in leading industrial centres, possession by each port of free ports; introduction of business codes; control over the empire; uniform cable codes; and finally, effecting favorable trade terms with world trading stations.

Great Bear Lake Minerals

Many Claims Have Already Been Staked and Great Activity Shows

According to reports received Ottawa, a great many mineral claims have already been staked in the area adjacent to the Bear Lake, North West Territories, and there is no likelihood that many more will be staked this summer. Some prospectors have already gone in aeroplane and others are planning to go in by boat. As far as mineralization is concerned, as the ice goes out. In view of great activity the Topographical Survey, Department of the Interior, Ottawa, has reprinted the manual respecting the law of mineral claims in Dominion lands for the use of Dominion land surveyors who may be called upon to make official surveys of these claims.

U.S. Wheat Exports

Made International Gain in March Over Recent Months

Wheat exports of the United States made a substantial gain in March over recent months. The index was 79, as compared with 73 in February and 74 in January. A year ago it was 55. All other export groups, however, fell off sharply.

All principal European countries except Italy took more wheat in March than a year ago. Total exports for the first season amounted to 106,985,000 bushels against 102,309,000 a year ago.

Development Of Aerial Photography

Notable progress has been made in aerial photography in the last few years and vertical aerial photographs for mapping some of the little known parts of the Dominion. The Topographical Survey Branch of the Department of the Interior, is the central clearing house for aerial photography in Canada, over 560,000 photo-graphs being on file in that branch to date.

"Are you going to take this lying down?" boomed the candidate.

"Of course not," said a voice from the rear of the hall, the shorthand reporters were doing that."

SMALL DAUGHTER DRESS SUITS GUINEA DRESS SUMMER WEARING

Add this new guinea dress to small daughter's wardrobe—both you and she will love it.

The clever design of this model takes yellow swiss with white dots for the skirt. Plain lace in French lace makes the skirt and shoulder straps. It is a most pleasing combination.

Of course all sorts of attractive summery materials could be used for this charming model. Tulle-toed stockings with a dainty white trim and red dots is very effective. Navy blue shorts with the stripes of red and white are also a high fashion and extremely fashionable.

Style No. 434 is designed for sizes 6, 8, 10 and 12 years. Size 10 requires 1½ yards of 35-inch material for the skirt and trim. Price of pattern 25 cents in stamps or coins (coin is preferred.) Wrap coin carefully.

Bees Are Preparing For Season's Work

Absurd Food and Protection From Cold Essential To Strong Colonies

During the winter months there is little or no activity within a bee colony, for during the cold weather the only matter of concern to the bees is to secure enough food and to keep warm.

Sometime last fall the queen ceased her egg-laying, and as the comb became empty of brood they were filled again during the winter. As the weather becomes cool the bees gradually cluster closer and closer around their queen until finally a fairly compact cluster was formed, and, except during an occasional spell of warm weather, this cluster may remain unbroken for a period of five or six months.

During the winter, the cluster moves about within the hive, at all times keeping in contact with the queen. From time to time the cluster will gradually loosen and expand and in the center of the cluster the young bees are engaged in their work of egg laying. Only a few eggs are laid at the start, but as the days lengthen and the sun becomes stronger, the number gradually increases until as high as 2,500 may be deposited daily.

In some cases the food available is not enough to sustain the cluster, and the bees will move to another location.

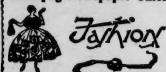

According to orange growers, however, the heat had accidents and the other half were about to have a rest, and for these they urged the use of orange juice in the diet.

"Life insurance firms who do not examine applicants for policies do not ask for a physical examination," he said after quoting an advertisement predicting the alleged horrible fate of coffee-drinkers by the manufacturers of a non-cafeine beverage.

"It is not healthy to consume huge quantities of milk if we wish to be healthy," he continued, "but with all mammals, the young receive milk from the female parent for a definite period and no longer."

In some parts of the world he pointed out, "milk is a rarity, yet people who live there do not die off like flies."

PROMOTED

L. A. B. Hutton, newly appointed superintendent of the Department of Communications, Algoma district, or the Canadian Pacific Railway. Mr. Hutton has been in charge of telegraphy as the department was formerly called, at Calgary, until the fall of 1931, when he was transferred to Winnipeg in the same capacity. His headquarters are now at Sudbury, Ontario.

Plants Valuable In Detecting Gas Leaks

Suggested As Safety Protection For Crews Of Submarines

Crews of submarines may in future carry potted tomato plants with them, as sailors on bigger ships have done so usually since so early as outdoor winterized colonies, egg-laying usually commences some time during the month of March, depending greatly upon the weather. In some localities such activity may be continuous even during the winter. Colonies do not usually start so early as outdoor winterized colonies, egg-laying is of great importance to the keeper of the eggs laid during the spring and summer, and the will produce the bees to gather the honey harvest. The larger the force of field bees at the commencement of the harvest, the greater will be the crop, and it follows that the greater the yield of eggs laid during the early part of the season, the larger will be the field force.

To get the maximum number of eggs laid, three things are necessary. A vigorous and prompt growth of an ample supply of pollen and adequate protection from cold and changeable weather. Neglect to supply any one of the three will result either in starvation and death of the colonies or in colonies that are too weak to bees to gather a surplus of nectar when the honey flow is on.

This is one of the possible uses for the peculiar behaviour of plants in the presence of ethylene gas that was suggested by Dr. G. M. Stewart, director of the Boyce Thompson Institute for Plant Research, speaking at one of the closing sessions of the American Philosophical Society's meeting at Philadelphia.

This is one of the possible uses for the peculiar behaviour of plants in the presence of ethylene gas that was suggested by Dr. G. M. Stewart, director of the Boyce Thompson Institute for Plant Research, speaking at one of the closing sessions of the American Philosophical Society's meeting at Philadelphia.

Dilutions of ethylene as low as one part in ten million of air will cause plant leaf stems to begin growing on the side opposite that did not grow before, thus causing them to bend downward instead of up. This effect was first demonstrated several years ago by Sarah L. Doubt, and has been the subject of much research by Drs. Crocker and other plant physiologists.

CU loudly, if a potted plant is turned upside down and then exposed to ethylene it does not react. The reason is that the ethylene anesthetizes the plant, destroying its response to bending.

CU loudly, if a potted plant is turned upside down and then exposed to ethylene it does not react. The reason is that the ethylene anesthetizes the plant, destroying its response to bending.

Lowest Price in Ten Years

"SALADA"

TEA

"Fresh from the Gardens"

The Past. The Present and The Future.

Poets have written of "The past I leave behind"; men of affairs have stated the same thing; wayfaring youth promising to reform have made such declarations; all of us have exhorted to "let the dead past bury its dead."

But can the past ever be left wholly behind? Does it not always intrude upon us, and does it not even project itself into the future? Is not the present made up largely of the accumulated experiences of the past, and will not the future be moulded in the experience of today? All history proves that this is so.

Furthermore, even if it were possible to leave the past behind, to wipe the whole slate clean and begin all over again as if what has gone before had not been, we still must live it over again. What is the past? In some respects, perhaps, yes; in other respects most decidedly, no.

The past, it is true, is now only of value for the experiences it has provided, for the lessons it has taught, for the accumulations of wisdom it has thus stored up for our guidance, for the advances that have been made, and are now ours, in the onward and upward march of the race since prehistoric days. And the value of these experiences it would be most unwise to completely blot out just because we could.

Even the mistakes, the errors, the foolishness, the sins of the past, should not be forgotten; they too, have their value. They are the signposts along the road of the present, stretching on into the future, to warn us of dangers, to point out what to avoid.

But the past and its experiences, instead as they resulted in discouragement and despair, in fear and woe, in wailing, breaking our courage, lessening our initiative and energies, should be relegated to the limbo of the forgotten. They have no value, and constitute nothing but hammering drags now and throughout the days and years to come. They may well be wholly erased from our memories; left to the past to be forever buried by and in it.

And the present? Is it our only opportunity? We have had a future, and we have had it. We have had the present; we have the future, and we have the past. And we have the past to guide us in the making and method of its use. And the future, if we are accorded one, will largely be what we make it by the use, or abuse, we make of the present.

Down through the ages our customs of life, our daily habits, our mode of thought and action, our institutions of government, our community existence, our social and political beliefs have all been moulded by the forms of today. Man has profited by the lessons and experiences of the past, and he must continue in the present to learn, and to apply his learning to the problems of the present if his own future, and the future of his children, and of the race, is to be better and brighter than is the present.

From the dark ages to the present manhood and the world in which we live have progressed. At different stages progress has been achieved by great upheavals, by revolution, but it has been through the less spectacular peaceful processes of evolution that the greatest upward strides have been made, those having the most far-reaching, the most beneficial and lasting results for the betterment of man. Very few, if any, experiences out of the past, have been for the worse of the two.

We have been suffering from a so-called business and economic depression. Times have been difficult and discouraging. Men and women in all countries and in all walks of life have been, and many still are, discouraged. Some are desperate, and talk revolution. But the past, if we will heed its warning, teaches us that by revolution we suffered the most, whatever may have been the ultimate medicinal reform that resulted, while it has been by and through evolution that the greatest gains and blessings to the masses of the world's inhabitants have been secured.

In times like the present, men's views become distorted and their thinking unsound. This is but natural; it is, indeed, human nature. They are prepared to accept the present without counting the cost of what the future will cast upon them and their descendants to pay for the mistakes they may thereby make.

The present, therefore, is not a time for man to say: "The past I leave behind," except in the sense that they leave the errors and follies and unsound thinking of the past out of their reckoning and plans for the present and the future. Let us study the past, the present, the future, the experiences of the past, and the results which moved from the past, with a view and a determination to profit thereby, rejecting what time and experience have proven to be bad, and incorporating, extending, strengthening those ideas and principles which have revealed their soundness in the warp and woof of the future.

A Really New Idea

Woman Eighty-Two Has Plan To Salvage Old Age

Lillian Jane Martin, consulting psychologist of San Francisco, who is a speaker and will celebrate her eighty-second birthday in July, arrived in New York the other day fresh and active after driving her own car across the continent and lecturing in twelve cities along the way. "I am here," she said, "to present the whole matter of salvaging old age. For example, the weakness of being too slow: Many old people started life when the tempo of society was not slower than it is today. And they may be unable to adjust to modern conditions. Both physical and mental exercises can be given them up to the speed of whatever industry they are in."

Small automobiles are becoming popular in British Malaya.

Record For Gold Receipts

High Point Broached At Royal Canadian Mint During April

Reaching a new high point in the records of the Royal Canadian Mint, coincident with the record Canada production, as reported to the Dominion Bureau of Statistics, the receipts of gold from Canadian mines in April amounted to \$26,333 fine ounces.

The previous record was established in December last when the receipts were 24,556 fine ounces worth \$5,766.65.

As the receipts in March were 18,832 fine ounces valued at \$4,099, the 982, the gain in the month was pronounced.

A reel of sound film was recently used in Australia as evidence against a noisy factory in a court suit.

Scotland's saving clubs are growing.

Her Heart Was So Bad Couldn't Do Housework

Mrs. R. Dragoman, R.R. 2, Midland, Ont., writes: "I have been troubled with heart trouble for many years."

My heart would beat so fast I could hardly breath. I also had headaches, and dizzy and fainting spells.

I couldn't get my housework done I was so weak.

I took three boxes of Milburn's Heart and Nerve Pills and feel much better now. I would not be without them in the future."

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

A Promising Sign

Many New Manufacturing Industries Settling in Northern Britain

Students of the British industrial situation are pointing out that the returns from the Patent Office indicate an increased tendency to protect Great Britain the production of committees which heretofore have been largely supplied from foreign countries.

It is of great interest to note, in this connection, that there have been many applications for patents for silk manufacturing. Indeed, large quantities are controlled by France for laundry machines, up to now regarded as an exclusive American monopoly; and for dye and alloy manufacturers, of which Germany is the principal originator in the past.

In all these varying fields, new industries have sprung up in the United Kingdom, and are as yet as dyers as always are concerned, the manufacturer is now predominantly British, while in others, such as the laundry, manufactured in Britain in ever-increasing volume. At a time when business is supposed to be going to the bow-wows, surely this is a promising sign.

Where Butter Is Dear

Russian Housewives Have To Pay \$3.60 Per Pound

Long queues of women are forming outside the milk bars in Moscow because of a serious shortage of butter, milk, eggs and sugar. After a year in which these lines of waiting housewives had been almost eliminated, they have been brought back to the doors of the so-called commercial stores by the arrival of a new type of rationing system.

Under the new system, which is government-owned, are distinct from the ordinary rationed government shops, from which dairy products have virtually disappeared. The new rationing system is based on higher prices and smaller food bowls.

Butter sells at about 729 rubles (approximately \$3.60) a pound and despite the price there is usually a race to the shop as soon as news of receipt of new supplies is circulated.

Acids In Stomach Cause Indigestion

Create Gastric, Gas and Pain. How To Treat

Medical authorities state that nearly-nineteenths of patients with stomach, intestinal, gas and pain complain of an excess of hydrochloric acid in the stomach. When the acid is too strong, the body is irritated, digestion is delayed and the result is constipation, flatulence, symptoms which every stomach sufferer knows.

Artificial daintiness are not the cause of acidosis, but real harm.

By laying aside all digestive aids and stimulants, the body will be relieved of excess acid and there is no need to take antacids. A simple tablet powder or tablet form—never liquid—will neutralize the acid and is inexpensive to take and is the most effective medicine for the purpose.

It is used by thousands of physicians and dentists with the most rapid of cures.

What Export

Prospects Are Seen For A Better Export Market In Near Future

Prospects of a better export movement of wheat, especially after July 1st, when southern hemisphere wheat is exhausted, are forecast in the monthly report of the statistical department of the Canadian Wheat Board on the movement of western Canada crops in April. Freight rates have dropped to low levels on the Great Lakes with little business offering. There has been a noticeable demand for rye of late.

Miller's Fortune Now only makes the infinite system untenable when the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness, constipation, flatulence, etc. It is believed that the worms create intestinal parasites which are inexplicable to take and is the most effective medicine for the purpose. It is used by thousands of physicians and dentists with the most rapid of cures.

No Wood Is Sold

The soldiest and soundest kind of wood is not really sold at all. It is full of insects, to be sure, and the total bulk consists of piles, trapped in the minute tubes and cell cavities that all wood is made of. This appears from the researches of Dr. D. T. MacDougal, of the Carnegie Institution of Washington, who reported them.

Nowadays people not only refuse to give credit where credit is due, but they won't give credit where cash is due either.

Pain spraying machines are just becoming popular in Bombay, India.

Ayr, Scotland, is to have public covered salt-water baths.

LOST 30 lbs. FAT IN 3 MONTHS

AT THE AGE OF 40

"I was very stout, and I have taken Kruchen Salts for 3 months, and have lost 30 lbs. I am a hearty eater, and have never dieted in any way. Also I have been taking Kruchen salts." —T. W. Barrett, that is an instance of Kruchen salts.

That is another instance. But if any person fat will be satisfied with the results of Kruchen Salts in a glass of water before breaking every meal you can lose fat in just the same way.

This is what Kruchen Salts does. It is being sold in every grocery store in the country, and every person who buys it loses weight by keeping the bowels, kidneys and liver in proper condition. Eat, sleep and live a vigorous and healthy energy you'll almost forget had existed. As a result of not planning your meals in an easy chair every free moment you have, you'll find time to do an hour's work for activity that keeps you moving around the things you've got to do. You'll find time to do it to keep you in good condition.

New Thieving Plan

Scotland Yard Looking For Gang Robbing Letter Boxes

A gang specializing in a combination of thieving and forging are occupying the attention of Scotland Yard. In search of letters containing cheques, money in bank and private letter-boxes, the gang are expert. Much of this work must prove futile, unless they have inside information or at populous times, such as the first of the month.

Forces of the mounted police checks is the only way to detect the gang, and only by the use of ultra-violet rays and the aid of a handwriting expert. The gang's methods are so characteristically clever that they offer means of identification of their handwriting.

If Edgar Wallace was still alive, a new book or play featuring these novel exploits might be expected in a few weeks— even days.

Radio In Dummy Funnel

This Innovation Will Be On New British Liner

A dummy funnel will be used to house the wireless equipment of the White Star liner "George V," which is rapidly nearing completion at Belfast.

The aerial and direction finder will be inside the giant funnel, and the receiving equipment, the electrical disturbance. The top of the funnel will be open, and with the aerial fitted on the roof of a cabin side, it will be possible to obtain uninterrupted wireless signals for direction finding.

It is believed, in fact, that the usual problem of eliminating electrical interference from the ship's motors will be unnecessary.

Like her sister ship the "Britannic," the "George V" will have two huge diagonal funnels, but as she is a motor vessel, only one is needed as an exhaust and ventilator.

Asthma Is Torture. No one who has suffered from asthma knows what such suffering is. Thousands do know, however, that expert medical advice is the relief provided by that marvelous preparation, Dr. J. H. McEwan, Commissioner of the R.C.M.P. He succeeds Inspector A. H. Joy, a famous Arctic officer, who died at Ottawa, April 29. The new inspector of the coast guard will be on his way to Montreal to take charge of his headquarters in Montreal.

Inspector Wunsch will visit his far northern posts this summer, leaving for the Arctic, July 9, aboard the Hudson's Bay Company vessel "Unaka."

Isabella Horses Are Scarce

Special Breed Can Be Obtained Only

In Germany

Isabella horses are being sought in Germany by C. G. Schuppan, representative as one of the best judges of horses in India, at the behest of a Maharaja.

They are a special breed with brownish yellow coats and white manes and tails. They are wanted to improve the blood stock.

Horses of this type used to be bred throughout Europe by various princes, the studs of the Kings of Hanover, Hesse and Bavaria, being specially noted for them, but now so far as is known they are only bred by one private dealer in Germany.

Flivver Derails Freight Train

Knocks Eight Freight Cars Off The Track At Level Crossing

There is a chance failing into a run barrel and crowding out crying for help.

Recently at a level crossing near Gravenhurst, Ont., a "flivver" sideswiped a Canadian National Railway freight train, causing a pile-up, and a man charged screaming and died.

He was found to have suffered from a heart attack.

Why suffer needlessly? Douglas' "Cure-all" will bring back health, restore the vital organs, and cure all diseases.

It is a natural product.

Eno keeps you Clean Inwardly

It's far more important to clean the inside than the outside of a milk bottle. For the same reason, clean intestines are far more important than clean face and hands. Nothing will cleanse your intestines better than ENO'S "Fruit Salt." Take it regularly, morning or night. Be Eno conscious!

CaW!

ENO'S FRUIT SALT

THE HOUSE OF DREAMS-COME-TRUE

BY —

MARGARET PEDLER
Author Of
"The Splendid Host," "The Merrill
Orchard," Etc., Etc.

Hodder & Stoughton, Ltd., London.

CHAPTER XXI.—Continued.

"Be good, my lady," he said, touching his hat. "Sir Adrian sent me to say that he's waiting for you in the car just along the road there." He pointed to where, on the white road, a dark sedan was coming. The Moor not far from the scene, the tutor, a stationary car, was visible.

Claire, her face ahen, turned to Nick in mute appeal.

"Yes, Nick, I thought he left for London this morning."

Nick shot the question fiercely at the chauffeur, but the man's face remained perfectly blank.

"No, sir, Sir Adrian drove as far as Exeter, then turned back. And he arrived in time to have dinner with us. They told us in the village we should find you at Shelton Tora."

Meanwhile the other members of the party were becoming aware that something unusual had occurred.

Claire, white, strained her eyes to see enough that something was amiss, and simultaneously Lady Anne and Jean hurried forward, filled with apprehension.

"What is it, Claire?" asked Lady Anne, suspending her breath of some kind. "What has happened?" Recognizing the Charnwood livery, she turned to the chauffeur and continued:

"Has Sir Adrian been ill? Are we to think he has had a stroke?"

"No, my lady, Sir Adrian is waiting in the car for her ladyship."

"Waiting in the car?" repeated Jean and Lady Anne in chorus.

The little group of friends drew closer together.

"Don't you see what it means?" broke out Claire in a low voice of intense anger. "It's been all a trick—a trick! He never meant to go to London. He's been here all the time, and that he was going, so that I should think that I was free and he could trap me." She looked at Nick and Jean significantly. "He must have

overheard us—that day in the shrubbery at Charnwood, when we met. They both nodded. "And then planned to humiliate me in front of the country."

"We'll go back with him," declared Nick, firmly. He was walking round and addressed the chattering stonily. "You can damn well tell your master that her ladyship will return this evening with the rest of the party."

The man's face twitched. As far as it went, for a well-drilled servant's face to express the human emotion of compassion, his did so.

"It would be good, sir," he said in a low voice. "It's most important that you should be safe."

But Nick had learned to detect the look of fear in a maid's eyes, and regarding this further delay as beyond bearing the chestnut created a diversion by going straight up in air and prancing gallantly to me. I didn't want the job, sir, as you may guess."

"Stand by now!"

Burke's calm tones fell reluctantly on the quivering, sensitive ears, and down came two shining hoofs in response, as the mare conceded herself to the saddle. The moment she was off, a springing burst, breaking every now and again, out of pure exuberance of spirits, into a canter, sternly repressed by those domineering hands whose quiet measured gait seemed conveyed along the reins as an electric current is carried by wire.

"You shouldn't be afraid," ejaculated Burke. "She'll settle down in a few moments. It's a stable head, I assure you. And—raise your voice a little."

Claire smiled a little wistfully, then said: "I'm afraid I won't be able to sit on her now," she said a trifle shakily. "Lady Anne is right—I must go."

She turned to the chauffeur, dismissing him with a little air of dignity, that, in her circumstances, was not without its charm. "You can go ahead, Langton, and tell Sir Adrian that I am coming."

The man touched his hat and moved off obediently.

"Now, Nick, I will walk down to the car with you," said Lady Anne. She was still full alive to the fact that her escort might contribute towards ameliorating the kind of reception Claire would obtain from her husband.

"I'm afraid I'll be a hindrance for a few minutes, will you?" And, raising her voice a little, "explain that Claire has been called home suddenly, as Sir Adrian was well enough to make the journey to town all alone."

But Lady Anne's well-meant endeavor to throw dust in the eyes of the rest of the party was of comparatively little use. Although to many of the Charnwood girls it was perfectly clear to all concerned that the detestable husband had actually insisted on her returning with him, exactly as a naughty child might be swept off home by an irate parent, in the middle of the night.

It was impossible to stop the flow of gossip, and though most of it was kindly enough, and wholeheartedly sympathetic to Lady Latimer, Jean's cheeks burned with indignation that Claire's dignity should be thus outraged.

The remainder of the afternoon was spent for her, and Nick's stormy face when he, together with Lady Anne, rejoined the rest of the party did not help to lighten her heart.

"I'm sorry," she whispered compassionately when presently the opportunity of a few words alone with him occurred.

He glared at her. "I'm sorry, too," he said shortly. "I'm not, I think I'm glad. This ends it. No woman can be expected to stand up with public humiliation of that sort."

"Nick!" There was a sharp note of fear in Jean's voice. "Nick, what do you mean? What are you going to do?"

There was an ugly expression on the handsome boyish-looking face.

"You'll know soon enough," was all he vocalized. And swung away from her.

Nick felt troubled. She had never seen Nick before with that ast, but still look on his face—a kind of bitter

concentration which reminded her forcibly of his brother—and she rather dreaded what it might portend.

He thought of the long, silent miles with the afternoon's unpleasant episode, and with the possible consequences which might accrue as she climbed into Burke's high dog-cart.

She had had no vacant seat in the household run, but had dismissed it since actually Claire's absence merely served to provide comfortable room for Burke in the Willow Ferry car, while she had the comfort of company on the outward journey. Moreover, she reflected that any change of plan, now that she had agreed to drive back with Burke, might only lead to trouble. He was not in a mood to be brought into it.

A big, raking chestnut, on wires to be off, danced between the shafts of the dog-cart, irritably pawing the ground and snorting. It had a satin-shaded head and down with a restless jingle of bit and curb chain. She showed considerably more of the white of a wicked-looking eye than was altogether reasonable, and Burke, with a gesture of the compulsion of the steady hand which gripped the reins and kept her, against her will, at a standstill.

The instant she felt Jean's light foot on the step her excitement rose to a pitch of fury. She leaped from the saddle, took a flying leap off, and a moment later, her master that her ladyship will return this evening with the rest of the party."

The man's face twitched. As far as it went, for a well-drilled servant's face to express the human emotion of compassion, his did so.

"It would be good, sir," he said in a low voice. "It's most important that you should be safe."

But Burke had learned to detect the look of fear in a maid's eyes, and regarding this further delay as beyond bearing the chestnut created a diversion by going straight up in air and prancing gallantly on wires to be off, dancing between the shafts of the dog-cart, irritably pawing the ground and snorting. LIFELESS FORM OF LINDBERGH BABY IS FOUND

Trenton, N.J.—Two tremendous blows on the head ended the life of Charles A. Lindbergh, Jr., the official autopsy by Dr. Charles A. Mitchell, county physician, disclosed.

The coroner's report showed that the skull had been fractured in the left side, the fracture extending from the top to just behind the left ear. The second blow was dealt on the right side of the head just back of the right ear, and left a hole one-half inch in diameter.

It was as if some adult person had held the baby tightly in his arms and deliberately hammered the head with the purpose of causing instant death.

"The cause of death is a fractured skull, due to external violence."

Dr. Mitchell's report confirmed that decomposition of the body had progressed to the point where it could be assumed that the child had been killed almost immediately after the kidnapping, depending on climatic and other conditions that might have produced such results.

The autopsy also indicated that the body had not been dismembered since the time of death, although this point was not covered definitely.

Teeth, cranial and other bone formations were given to confirm the identification of the child, although the autopsy was purely technical and did not include a post-mortem examination.

Dr. Mitchell said there was evidence of a hemorrhage on the inner surface of the left side of the skull at the point of fracture. This would indicate that the blow on the left side of the head might have been the one that caused the death.

The scalp was so badly decomposed that it was impossible to find any contusions or hemorrhagic conditions external to the skull, Dr. Mitchell added. Thus it was impossible from a medical point of view to tell the police in the hunt for the actual instrument of death.

The autopsy reports did not speculate as to blows and such, but left the diagnosis at "external violence."

It was impossible to pronounce such fractures, however, as due to blows delivered on the head rather than accidental fractures.

Tax Boost in Ireland

Steep Increases In Tariffs Proposed In De Valera Budget

Dublin, Irish Free State—Steel increases in tariff and income taxes were proposed in the budget of the De Valera government, which was introduced in the full strain.

The budget provided for a duty on a farthing a pound and a pack-tax of two pence on each tonne of wheat, on both a bushel and acreage basis. It was voted down by the House of Commons. Without a recorded vote two motions were defeated, the first from Robert Gardiner, leader of the farm bloc, suggesting continuation of the existing ceiling except where it was exceeded; the second from Dr. Thomas Donnelly, Liberal, Willow Bush, proposing a five cent bonus on a seed-crop basis.

In discussing the question of wheat in its relation to the welfare of Canada and world trade, it must be remembered that the greatest proportion of wheat was produced in the prairie provinces, Mr. Gardiner declared. During the early part of the present century many people had been induced to go to western Canada and grow grain, which were said to be their wheat-growing base.

The income tax would be raised from three shillings six pence to five shillings in the pound.

De Valera's budget is necessary to make both ends meet in the nation's finances because President De Valera's government faced a budgetary deficit of \$500,000,000.

The budget provided for extending the consumption tax to cover dancing, outdoor sports, motor racing and dog racing. It also set forth an increase of one shilling two pence a pound in the duty on tobacco.

An International Problem

Frequent Economic Crisis Is Worldwide And Too Deep-Seated For Solution

Ottawa, Que.—Unemployment is an international problem and must receive international consideration, Tom Moore, president of the Trades and Labor Congress of Canada, said when he arrived here on the Canadian Parliament's annual session. Mr. Moore was a Canadian labor delegate to the International Labor Conference at Geneva.

Unemployment formed the chief topic of discussion at the conference. Mr. Moore said the delegates agreed that the present economic crisis is worldwide and too deep-seated for individual action.

Typhoon Takes Many Lives

Hampton, French Indo-China.—The resident-general was informed 134 bodies had been washed ashore in the State of Annam since a recent typhoon struck the territory. Five hundred houses were destroyed and 600 small fishing boats went to the bottom.

Drama Of The Skies

Two Men Of Missing Crew Lose Lives When Daring Attempt To Land

Camp Kearny, Calif.—A tragic drama of the skies was written in an unsuccessful attempt of the world's largest airship, the "U.S.S. Akron," to land here.

Two men in the mooring crew were dashed to death and a third, End Cowart, was carried two hours dangling on a 300-foot rope from the navy airship.

Ten thousand spectators saw the crash, which occurred on the right side of the head just back of the right ear, and left a hole one-half inch in diameter.

Then he was rescued, hauled into a hatch of the big ship. A message dropped from the airship:

"Cowart, O.K., it is bad."

A vast sigh of relief went up.

The climax to the westward crossing of the Akron, which left Lakehurst, N.J., on its first trans-continental flight, came during efforts to make an emergency mooring at Camp Kearny after an aerial voyage fraught with storms.

Several attempts to bring the great skyship down had been made by a determined ground crew when upwinds suddenly caught the ship.

Robert Edall and Nigel Henton, both of the San Diego naval training station, and Cowart clung to the landing line as the Akron surged upward. Edall and Henton lost their grip and fell to death, but Cowart clung on.

Upward the great ship swayed with Cowart clinging to the line 300 feet above the dirigible. A height of 2,000 feet was reached when Cowart maintained his precarious grip. Through bumpy air the Akron sailed, but Cowart clung on.

Minutes later he seemed like hours to the gasping crowd below as the Akron crossed through the bumpy air, rocking up and down, with the plucky Cowart dragging along. Then it was noted the distance between Cowart and the Akron began slowly to close.

There was no winch on the rope. It was slow work hoisting Cowart up by hand. At last he was dragged through a cockpit.

Both Bushel and Acreage Bonus Are Rejected

Ottawa, Ont.—A bonus scheme for wheat, on both a bushel and acreage basis, was turned down by the House of Commons. Without a recorded vote two motions were defeated, the first from Robert Gardiner, leader of the farm bloc, suggesting continuation of the existing ceiling except where it was exceeded; the second from Dr. Thomas Donnelly, Liberal, Willow Bush, proposing a five cent bonus on a seed-crop basis.

In discussing the question of wheat in its relation to the welfare of Canada and world trade, it must be remembered that the greatest proportion of wheat was produced in the prairie provinces, Mr. Gardiner declared. During the early part of the present century many people had been induced to go to western Canada and grow grain, which were said to be their wheat-growing base.

NEW POLITICAL PARTY ADVANCED FOR ALBERTA

Drumheller, Alberta.—An independent political organization for Alberta, drawing its support from all spheres of life and from all old political units was announced by F. C. Moyer, independent M.L.A. for Drumheller, in an attack on the Farmer Government of Alberta. Mr. Moyer was giving an account of the past session of the Alberta legislature to his constituents.

"This new party, to be called the Provincial Party, is a development and enlargement of the independent idea in Alberta politics, bringing all the people of Alberta together in the government and enlisting all who are prepared to contribute their ideas and efforts toward the betterment of the province," Mr. Moyer declared.

"It is not a Conservative movement, nor is it a New Democratic movement, nor is it the Farmer or Labor Party in a new guise. But we welcome all who seek not the success of a party but seek not the success of a party of a people. No one person or group has a monopoly of wisdom, so we seek all classes that we may have a cross-section of the life of the province."

In launching the plans for organization of the Provincial Party Mr. Moyer emphasized that it would be based on the independent principle, that the members of the party, the nucleus of the new party would be forced to follow the dictates of the party's cabinet if it were elected to power in Alberta.

"We want the elected members to go on the floor of the legislature and demand that they be allowed to make their own laws."

Estimated Loss From Incendiary Fire Set At \$75,000

Menchen, Sask.—Salvage crews have commenced in the work of clearing up the debris of the three local elevators which were destroyed by incendiary fire Saturday night, resulting in 70,000 bushels of grain.

Estimated loss from the fire, including loss of wheat, has been set at \$75,000.

It is expected that the work of clearing up will take about two weeks.

The Saskatchewan Wheat Pool, Alberta Pacific Grain Company and Standard Grain Company, owners of the three elevators, have signified their intention of rebuilding the structures.

R.C.M.P. are still investigating.

Alberta Commission To Investigate Banking

Canadian Finance In General Will Be Subject Of Study

Edmonton, Alberta.—Appointment of a commission to make a thorough study of Canadian finance and banking systems and investigation of systems of leasing public lands instead of free holding or outright selling of land was announced by Premier J. E. Browne. The commission will also study finance in general.

Through its investigation of the Canadian Agricultural Commission,

the proportion of votes cast at the general elections in Alberta in 1930, said Mr. Moyer, the independent should have nine representatives on the Dominion parliament. Instead, they had only two.

Referring to organization, Mr. Moyer said that because he was the present leader of the group of three who had organized the Provincial Party, he felt that he would be the leader of the Provincial Party. "Many strong men will be found in our ranks after the next election, and it is for them to elect a leader," he declared.

Progressive members had been long awaiting some declaration of policy by the government with regard to the wheat-growers, Mr. Gardner said. He also said that the members of the government were bearing tremendous responsibilities, and felt sympathy with them in the burden they were called upon to bear. But that fact did not release him from the responsibility of inquiring from the government what the policy was.

"We produce the best wheat in the world, and we are proud of it," Mr. Gardner continued. But it cost about 76 cents a bushel to produce No. 1 wheat on the basis of twenty bushels per acre, and 76 cents a bushel for No. 1 wheat at the head of the lakes was approximately 50 cents a bushel. Consequently, every bushel grown meant a loss of seventeen cents. The wheat farmer could not keep his wheat along with sugar prices.

Prices of commodities which the farmer used were somewhere lower than in the past, he declared. On the other hand, they had not fallen to the extent which wheat prices had dropped.

Delegates Sail For Home

Hamilton, Bermuda.—Carrying with them to their home parliaments new information on Imperial trade, British and Canadian delegations to the tripartite conference here sailed from Bermuda May 11. Work of the conference was concluded May 9.

HELD IN SLAYING

Filling a murder charge against James Keith Miller, 36, a Canadian aviator and partner of Mrs. Jessie Keith-Miller, Australian flier, clinched a ten-day investigation into the death of Helen Clark, author, at Miami, Florida. It is believed that Clark had taken his own life, but now police charge that notes which led to that belief were forged.

The new party, to be called the Provincial Party, is a development and enlargement of the independent idea in Alberta politics, bringing all the people of Alberta together in the government and enlisting all who are prepared to contribute their ideas and efforts toward the betterment of the province," Mr. Moyer declared.

"It is not a Conservative movement, nor is it a New Democratic movement, nor is it the Farmer or Labor Party in a new guise. But we welcome all who seek not the success of a party but seek not the success of a party of a people. No one person or group has a monopoly of wisdom, so we seek all classes that we may have a cross-section of the life of the province."

In launching the plans for organization of the Provincial Party Mr. Moyer emphasized that it would be based on the independent principle, that the members of the party, the nucleus of the new party would be forced to follow the dictates of the party's cabinet if it were elected to power in Alberta.

Estimated loss from the fire, including loss of wheat, has been set at \$75,000.

It is expected that the work of clearing up will take about two weeks.

The Saskatchewan Wheat Pool, Alberta Pacific Grain Company and Standard Grain Company, owners of the three elevators, have signified their intention of rebuilding the structures.

R.C.M.P. are still investigating.

Alberta Commission To Investigate Banking

Canadian Finance In General Will Be Subject Of Study

Edmonton, Alberta.—Appointment of a commission to make a thorough study of Canadian finance and banking systems and investigation of systems of leasing public lands instead of free holding or outright selling of land was announced by Premier J. E. Browne. The commission will also study finance in general.

Through its investigation of the Canadian Agricultural Commission,

the proportion of votes cast at the general elections in Alberta in 1930, said Mr. Moyer, the independent should have nine representatives on the Dominion parliament. Instead, they had only two.

Referring to organization, Mr. Moyer said that because he was the present leader of the group of three who had organized the Provincial Party, he felt that he would be the leader of the Provincial Party. "Many strong men will be found in our ranks after the next election, and it is for them to elect a leader," he declared.

Progressive members had been long awaiting some declaration of policy by the government with regard to the wheat-growers, Mr. Gardner said. He also said that the members of the government were bearing tremendous responsibilities, and felt sympathy with them in the burden they were called upon to bear. But that fact did not release him from the responsibility of inquiring from the government what the policy was.

"We produce the best wheat in the world, and we are proud of it," Mr. Gardner continued. But it cost about 76 cents a bushel to produce No. 1 wheat on the basis of twenty bushels per acre, and 76 cents a bushel for No. 1 wheat at the head of the lakes was approximately 50 cents a bushel. Consequently, every bushel grown meant a loss of seventeen cents. The wheat farmer could not keep his wheat along with sugar prices.

Prices of commodities which the farmer used were somewhere lower than in the past, he declared. On the other hand, they had not fallen to the extent which wheat prices had dropped.

C.G.I.T. Holds Banquet

Old times were renewed when, on Friday, May 9, a very enjoyable Mother and Daughter banquet was put on by the C. G. I. T. in the dining room of the Community Hall.

Singing by the C. G. I. T. followed by grace, opened the banquet. This was followed by a welcoming speech by Roberta Smith. The first toast of the evening was given in honor to the Mothers, a Majoris McCallum, and replied to by the singing of Mother. Rev. Peter Dawson replied to the toast to the Church given by Barbara Dawson. Mrs. R. B. Baker gave a wonderful reply to the toast to the house, forwarded by Helen Smith. After this the year's report of the work of the C. G. I. T. club was given.

An enjoyable program followed which included a solo by Rev. Dawson, a charming address by Mr. J. N. Beauber, a piano solo by Lona Stephenson, a reading by Roberta Smith, a solo by Ada Williamson, a reading by Mrs. Dawson, May, a old and new song was sung by all in the singing song. A short play, called "Unbleached Calico" was put on by the girls of the club and was followed by intermission.

This very enjoyable evening was brought to an end with the girls closing song, followed by "Taps."

On Monday night a call came from Edinburgh, Indiana from Miss Elva Bowman, daughter of Mr. Wm. Bowman. The call was unusually clear considering it came over a distance of 3,000 miles.

Jess Goodnight was the fortunate winner of the congoon rug, guessing the correct number in the contest conducted by Farmer's Hardware.

Mrs. Adams and W. Adams are business visitors in Calgary this week.

Champion Loses to Vulcan

The baseball game held on Wednesday evening between Champion and Vulcan ended 7-5 in favor of Vulcan. Neither side scored a run until the 5th inning, when Vulcan ran in three. In the 6th inning Champion gained two runs and Vulcan one. The 7th inning saw each team make a run, and in the eighth each team ran in two runs making the final score 7-5.

McLaren and Watts, Champion and McAuliffe and Revere, Vulcan won the batteries.

Champion shows a need of much practice because of the countless errors and there is no reason why they shouldn't get this practice. We will hope to see better results from our team in the future.

Since the sign men have been in town store-fronts have taken a decided change in appearance, especially Sisson's Restaurant. Frank should sell a package of Milkshakes every day instead of the usual one a week.

The C. W. L. will hold a Bake Sale and Tea at the home of Mrs. D. D. Farmer on Saturday, May 21, commencing at 3:00 o'clock. There will also be a draw for the doll.

A baptismal service was held at the ditch camp south of the Guess ranch on Tuesday when Kenneth Archibald, son of Mr. and Mrs. Burton Ruggles was baptized.

Mrs. Cowell and family wish to express their sincere thanks and gratitude for the many kindnesses shown them during their recent sad bereavement.

The wind storms would soon urge the most advanced adaptations and preventive methods for soil drifting. The striping system seems to provide the most satisfactory means yet advanced for this purpose and farmers in the district are adapting this method. Big fields of summerfallow suffer most from soil drifting and where the strip method is used the damage has been greatly minimized.
